Senior Software Engineer · Enterprise Applications · Java / Spring Boot · Angular · AWS

PROFESSIONAL SUMMARY

Software engineer with 7+ years of experience delivering production software across enterprise web applications, mobile inspection platforms, cloud-hosted backend services, and automated reporting systems. Experienced in modernizing legacy applications, developing REST APIs, integrating backend services, and supporting business-critical systems running in production environments. Strong background in Angular, Java/Spring Boot, AWS, MySQL, and enterprise software delivery within Agile teams.

EXPERIENCE

Senior Software Engineer – *Parsons Corporation*

2024 – Present

- Delivered production software enhancements across enterprise inspection platforms supporting regulatory and compliance workflows used by distributed field operations.
- Developed and maintained AWS-hosted Java/Spring Boot services, REST APIs, database integrations, and automated reporting workflows supporting business-critical production systems.
- Reduced reporting maintenance effort by standardizing JasperReports and Jaspersoft Studio templates, enabling faster implementation of report changes and reducing production defects.
- Improved release quality through integration testing, API validation, troubleshooting, and collaboration with development and QA teams across multiple software releases.
- Contributed to modernization initiatives by extending AngularJS applications and implementing modern Angular components, improving maintainability and long-term platform sustainability.

Software Development Engineer – *Parsons Corporation*

2021 – 2024

- Developed and maintained enterprise web applications for large-scale inspection, compliance operations.
- Built REST API integrations, backend services, validation frameworks, and production support tooling using Java, Tomcat, MySQL, Angular, and related technologies.
- Improved application reliability and user experience through accessibility enhancements, error handling improvements, and validation redesigns.
- Collaborated with development teams to deliver production releases, continuous platform improvements.
- Participated in modernization efforts focused on reducing technical debt and improving maintainability of long-lived enterprise software systems.

Software Development Consultant

2018 – Present

- Delivered end-to-end custom web solutions, application enhancements, performance improvements, and technical consulting services for small and medium-sized businesses.
- Modernized public-facing websites, content management systems, improving maintainability and UX.

TECH STACK

Frontend: Angular, AngularJS, React, Ionic, TypeScript, JavaScript, HTML5/CSS3

Backend: Java, Spring Boot, Tomcat, Node.js, Python, Flask, REST APIs, API Integration

Cloud: AWS, Linux, CI/CD

Data: MySQL, MongoDB

Reporting: JasperReports, Jaspersoft Studio

Tools: Git, Postman

EDUCATION

Seneca College – Electronics Engineering Technology

BrainStation – Full-Stack Web Development Program
